The Green Room™ is a Global kind of *Mr Roger's Neighborhood for the Green Generation*. It is responsible positive media for children, addressing planetary changes, childhood obesity, and other ongoing life issues that kids are routinely exposed to.

Synopsis

Children are invited into the adult world of hostess Cherry Capri™, an eccentric *Auntie Mame* figure that is fun, funny, trustworthy and caring. Her daily activities center on a planet-friendly lifestyle. Episodes consist of Cherry speaking directly to her viewers about educational subjects, demonstrations, healthy habits and interacting with others. Every show includes an imaginary trip to ecology-minded “**Futura World™**,” a domed city on the moon with *SHAG* designed “puppetry” citizens. Stories on Futura World allow further development of the day’s themes.

Each episode instructs children about how to be physically and emotionally healthy, and addresses common childhood fears with comforting songs & skits with a distinctive earnest spirit.

Mission

To provide a *calm* safe place for children to learn about themselves and the world around them built on developmentally appropriate standards and practices.

To align traditional values with, and promote Shared Core Values that help children develop skills for learning such as: integrity, patience, compassion, consideration, self-esteem, self-control, creativity, responsibility, imagination, curiosity, cooperation, appreciation of diversity, persistence, structure and how to find peaceful ways of dealing with complicated feelings and issues.

Primary Players

Cherry Capri™

Cherry is a quirky Mary Poppins meets Auntie Mame figure who teaches love and acceptance with her garden, friends, cooking, decorating, crafts and her retro home.

Rich Million™

Rich is a high energy motivational coach who dresses in a gold suit. He gives daily success affirmations, and encourages exercise for everyone.
